

FOLK MAGAZINE N.4

The theatre of Cuticchio's puppets

When our partner went to visit us in Trapani for the Italian meeting , we took them in a lot of beautiful places of our province: Trapani, Erice, Valderice, Custonaci and also in Palermo. Palermo is the capital of Sicily and it's a fantastic huge city.

When we were in Palermo we visited a very interesting place: the Cuticchio's theatre. The puppets are made of wood, iron or steel . Their faces are painted with delicate colours and overall the female characters are very gorgeous. I liked it a lot and I was involved in translating all the information from Italian into English to my schoolmates and other foreign countries people.

We talked about this particular kind of theatre, the Puppets' origin and different characters: for example Orlando, Angelica and other knights. All people showed interest and at the end I was very satisfied. I succeeded in doing a comprehensible translation. I have won my challenge.
